

# Problem Statement

Author: Mason Word

## What is the Problem?

The gyms on campus are overcrowded, sweaty, and there's a line for most equipment. It's hard to gauge which hours the gyms would have less traffic and its hardly worth the commute just to turn around.

## Who is experiencing the problem?

Students and faculty who want on-campus provided spaces for working out.

## Where does the problem present itself?

Any and all of the gyms on campus.

## Why does it matter?

This matters because many students who want to go to the gym feel discouraged due to how overcrowded the gyms are.
